Title: Near fatal Intoxication by Nicotine and Propylene Glycol Injection: A Case Report of an ELiquid Poisoning

Version: 0 Date: 23 Nov 2018

Reviewer: Nasim Zamani

Reviewer's report:

Dear Authors:

Thank you for reporting this interesting case. I just had few questions about your case:

1- You patient had injected the solution in his forearm. What happened in the site of injection? Did he experience cellulitis, necrosis, allergy or something? I think adding this data may be interesting to the readers because as you have mentioned we have very few cases of injection of the chemicals.

2- Did the patient experience any arrythmia during the hospitalization and follow-up?

3- I think the Discussion would be better to be shortened a little bit.

Yours

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
