Introduction:

The argument about the significance of this study is not comprehensive enough. The authors need to strengthen this point.

Page 2, paragraph 1, line 89:

What is this word "opt" means?

Page 2, paragraph 2, line 96:

Is the CrCl <35? All the arguments before were about 30!

The authors need to elaborate more on the use of heparin in some of the patients in both groups and if this would affect on the findings

Table 1:

There are some differences in the basic characteristics of the patients, although, it is not statistically significant, but these differences may affect on the final results of the study.

Are the methods appropriate and well described?
