Reviewer’s report

Title: Tigecycline-induced sustained and severe hypoglycemia: a case report

Version: 2 Date: 13 Jun 2019

Reviewer: Hesham Al-Sallami

Reviewer's report:

The authors of the article titled "Tigecycline-induced sustained and severe hypoglycemia: a case report" describe a patient who was treated with tigecycline for atypical pneumonia and went on to develop severe and sustained hypoglycaemia.

The article is well-written and the findings are expected to be of interest to the journal's readership. The authors provide sufficient detail and adequate discussion of the findings in light of the patient's history and published literature.

Minor comment:
Please replace the term "level" with "concentration" when referring to glucose plasma/blood concentration (e.g. "blood glucose concentration of 15 mmol/L").

Regards and best wishes.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
