Title: Relationship between adverse drug reactions to antibacterial agents and the Klebsiella pneumoniae carbapenemase-producing (KPC) Klebsiella pneumoniae outbreak: insight from a pharmacovigilance study.

Version: 0 Date: 12 Sep 2019

Reviewer: Turhan Dost

Reviewer's report:

The manuscript entitled "Relationship between adverse drug reactions to antibacterial agents and the Klebsiella pneumoniae carbapenemase-producing (KPC) Klebsiella pneumoniae outbreak: insight from a pharmacovigilance study" is a comprehensive pharmacovigilance study about adverse reactions belongs to drugs used in the treatment of Klebsiella pneumoniae carbapenemase-producing (KPC) Klebsiella pneumoniae. Microbiological and pharmacovigilance data of different therapies are reviewed and compared in this study. Although no new safety signals emerge with the use of ceftazidime-avibactam, it should not be ignored that its use is new and there may be increase in ADRs.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
