Title: Analysis of Apoptosis Related Genes in Nurses Exposed to Anti-Neoplastic Drugs

Version: 2 Date: 21 Oct 2019

Reviewer: Maja Antunović

Reviewer's report:

The authors have improved the content of the manuscript significantly. The scientific language has improved as well as structure and grammar. The methodology and results have been ordered as well. Gene abbreviations are written in italic, but the authors put protein abbreviations in italic as well (introduction, discussion). In general, symbols for genes are italicized (e.g., IGF1), whereas symbols for proteins are not italicized (e.g., IGFl). This should be corrected throughout the manuscript.
