Title: The effects of oral administration of Cola nitida on the pharmacokinetic profile of metoclopramide in rabbits

Version: 3 Date: 19 Sep 2019

Reviewer: Peter Penson

Reviewer's report:

Please be more explicit in your discussion about the weaknesses of the experimental design with respect to controls and small sample size. My previous criticism of the figure plotting appears to have been misunderstood. My criticism was of the meandering lines joining points which do not have any basis in the data (see attached file). I do not think the references you supplied justify this approach.
