Reviewer’s report

Title: Severe intoxication caused by sodium-glucose cotransporter 2 inhibitor overdose: a case report

Version: 0 Date: 05 Oct 2019

Reviewer: Hossein Hassanian-Moghaddam

Reviewer's report:

This is an interesting case report, that describe an almost new antidiabetic toxicity agent.

The following suggestions are aimed at improving the presentation and the scientific merit of the manuscript:

1. Abstract:
   a. Page 2, line 38: "Her blood glucose level declined slightly but was in the normal range due to glucose". I am curious to know that why you administrated glucose prophylactically.

2. Case presentation:
   a. Page 7, line 67-80: Any explanation for bradycardia and hypotension? If this is a slight hypotension (that I believe is not), using norepinephrine is against it.
   b. Page 5, lines 90-91: Needs reference

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
