Comments to the Author

The authors described a case report with visual hallucinations induced by pregabalin. This is interesting and important report; however, there are a few points to be corrected in the revised manuscript.

1) The authors should check a reference [20]. "Clin Toxicol 2013; 51 (4): 320" was not picked up on PubMed search engines.
2) The description "Norgaard et al. reported a 38 year-old man was self-administering 8.4 g pregabalin daily" in the Discussion (Page 5; Lines 46-50), is about pregabalin abuse. At least, the previous sentences, the authors should describe pregabalin abuse. A reference (Clin Drug Investig, 2016, 36 (9): 735-742) about pregabalin abuse had better be used.
