Reviewer’s report

Title: Association of parental body mass index (BMI) with child's health behaviors and child's BMI depend on child's age

Version: 1 Date: 07 Jan 2019

Reviewer: Jennifer Kuk

Reviewer's report:

Thank you for addressing all of my concerns. One last point.

"Averaged across all age groups, parental BMI was significantly positively associated with FV intake (0.2 more times per day per 10-unit difference in parent BMI, p=.029)". This seems like a very small effect to be significant. Please check and add error variance measures, also it seems strange to express it per 10-unit difference in BMI (page 8)

Are the methods appropriate and well described? If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
