Title: Performance of Neck Circumference to Predict Obesity and Metabolic Syndrome among Adult Saudis: A Cross-sectional study

Version: 0 Date: 12 Nov 2018

Reviewer: Ahmet Ozturk

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The presented work is quite sufficient in terms of sample and variable size. It includes innovations that can contribute to obesity and metabolic syndrome.

1. Page 9 of 10 in row: The multivariate should be changed to multiple.

2. In all tables p values should be given 3 digits.

3. Page 11 of 50 in row: It should be emphasized that there may be an additional indicator instead of evidence.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
