Reviewer’s report

Title: Mistaken perception of lipid intake and its effects: a randomized trial

Version: 1 Date: 07 Dec 2016

Reviewer: Leila Karhunen

Reviewer's report:

The authors have successfully responded most of the reviewer's comments and manuscript is markedly improved. However, there are still some aspects in the manuscript that should be taken into account. First, the quality of written English is not always adequate and the text therefore needs language corrections. Second, the title of the manuscript is still not clear. Please, consider revising it. Also the conclusions, especially at the end of the discussion, do not fully answer the aim of the study, especially related to the prevalence of individuals classified in the pseudo-maintenance and non-reflective action stages.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
