Title: Risk Factors Associated with Poor Health Outcomes for Children under the Age of 5 with Moderate Acute Malnutrition in Rural Fagita Lekoma District, Awi Zone, Amhara, Ethiopia, 2016

Version: 3 Date: 20 Nov 2017

Reviewer: Silvia Berciano

Reviewer's report:

The authors have been very responsive and their effort to incorporate the suggested modifications is appreciated, but a couple of minor points should be addressed:

Page 12, Line 15: "20 higher" would be incorrect. Since AHR=2.19, the risk of poor health outcomes among children born of pregnancies that were both unwanted and unplanned was "2.19 times" (or "119% higher than") the risk among children born of wanted and/or planned pregnancies.

Figure 1: Consider replacing the label "Till when did she exclusively breast feed?" by a more standard "Exclusive breastfeeding duration".
