Reviewer's report:

The resubmitted manuscript made substantial revision and address pervious comments well. Few suggestions as below:

1. Move "Ethics approval and consent to participants" and "Consent for publication" to Method section.

2. In Method section, provide more detailed information about study procedure and participants. For example, describe recruitment method (where and how those 25 participants recruited, how initial 25 was down to 10 in the focus groups, ..), the structure of interview (instructed open questions?..), demographic of participants (gender, length of cancer, length of post cancer, etc)

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
