Maternal nutritional supplement delivery in developing countries: A scoping review

NUTN-D-18-00115R1

Thanks for inviting me to revise this resourceful manuscript. I have seen authors response based on my concern. I am satisfied with all response stated to my previous concern. However, I will recommend one additional concern stated below in the abstract section.

Abstract:

Reporting the objective in separate paragraphs is not recommended, better if you merge it with the background. As follow:

Background.

Maternal under-nutrition in low-income countries has been inextricably linked to negative child outcomes. Developing countries lack policies for monitoring and evaluating maternal nutritional programs, which has led to a gap in data collection regarding the effectiveness of prenatal supplement delivery methods. The objective of this scoping review is to examine and determine the delivery methods of maternal nutritional supplements in developing countries.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
