Reviewer's report:

The authors have responded to all the comments by re-analysing the data and providing some figures. I have some additional suggestions. Please consider whether the suggestions will improve the clarification of the manuscript.

- Page 10, Line 192 and Line 197: please ensure that the statistic, 'Kruskal-Wallis 1-way ANOVA test', is correct. I think the Kruskal-Wallis test (non-parametric test) and one-way ANOVA (parametric test) are different statistics.

- Please consider adding the percent (%) for each bar in Figure 2 and 3. Since the analyses are Chi-squared tests.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
