Reviewer's report:

Needs editing by a native english writer

The authors have given many references of studies done in the same country on prelacteal feeding practices. So what is the new information which has emerged from this research?

In methodology the emphasis is more on data analysis rather than on tools and techniques used. A balance of the two should be achieved.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
