Reviewer's report

Title: Diet satisfaction and associated factors among adult surgical orthopaedic patients admitted at a teaching hospital in Lusaka province, Zambia; A hospital-based cross-sectional study

Version: 2 Date: 15 Apr 2018

Reviewer: Jorja Collins

Reviewer's report:

The authors have addressed all comments provided by the reviewers, and the revised manuscript is significantly improved.

I commend you on your ability to take on and respond to the feedback (of which there was a lot!) provided.

A few further comments should be addressed:

1. minor grammatical/spelling errors - line 35 its' cleints; line 116 used to take; line 208 countrys'

2. Table 1 - please give the units and currency for 'monthly income'

3. Thank you for providing the section 'Additional information from relevant foodservice staff'. It is essential to provide context to the study. However, this section should be reported in the method as the second paragraph under the heading 'Study population'. This paragraph describes in detail the foodservice system associated with the population you studied. It is not an outcome of your study, so it doesn't belong in the results. The paragraph should also be re-written so that it appears it is in your own words, not the words of the person who you asked for the information.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
