Reviewer’s report

Title: Prevalence and associated factors of undernutrition among under-five children from model and non-model Households in East Gojjam Zone, Northwest Ethiopia: A comparative crosssectional study

Version: 2 Date: 29 Jan 2019

Reviewer: Reviewer 2

Reviewer's report:

"REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? Yes

Reviewer comments: I compliment the authors for revising the MS extensively and adding the revised table's figures as additional files. Overall the MS read much better now than the previous version. A few more minor suggestions to further strengthen the paper.

1) Additional and main table write bivariable, multivariable instead better write as univariate and multivariate analyses

2) in the table column headings, need not write crude and adjusted in a separate row, could they indicate these in title of table, as COR and AOR imply the same.

3) authors acknowledge the not studying all the associated factors as per UNICEF framework and wider confidence intervals as result of disaggregate analyses about associated factors as a limitation.

4) there are many more outstanding and new typos, spelling, grammar errors that need to be fixed."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
