Reviewer’s report

Title: Association between delivery methods for enteral nutrition and physical status among older adults

Version: 0 Date: 07 Sep 2019

Reviewer: Nicola Veronese

Reviewer's report:

Very interesting paper with important clinical findings. I only suggest to the authors to add the prevalence of dementia in table 1 (is an important cause for enteral nutrition) e to give some space (a paragraph) regarding the potential association between use of PEG, dementia and frailty status.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
