Reviewer’s report

Title: Nutrition education and cooking workshops for families of children with cancer: a feasibility study

Version: 1 Date: 13 Oct 2019

Reviewer: Marla Reicks

Reviewer's report:

The authors responded adequately to the comments. The methods and results are now more clear, however, the manuscript still needs extensive editing for missing words, grammar/typos. Two additional revisions could improve clarity.

Suggest that the word "approved" should be replaced with "tested" line 116. The word "approved" raises questions about criteria for approval and who gave approval. The iterative process was used to test the workshops for feasibility not approve them.

Table 1 - Field Notes row - revise the "Data collected" to "1. Notes from the facilitator during activity promotion based on feedback from families present in the Division of Hematology-Oncology", revise the "Responsible for completing the tool" column to "Registered dietician facilitator". The dietitian completed the tool, not the families.

Are the methods appropriate and well described? 
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? 
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? 
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
