Reviewer’s report

Title: Nutrition education and cooking workshops for families of children with cancer: a feasibility study

Version: 1 Date: 17 Oct 2019

Reviewer: Joya Chandra

Reviewer's report:

Overall Dr. Marcil and her colleagues have been very receptive to reviewer comments, and the manuscript is much improved, particularly in terms of describing methodology and study specifics. I understand from the response to review that patient diagnoses was not collected, however, this is a potentially relevant point for diet and nutrition issues. Inclusion of the fact that it was not collected should be clearly cited in the methods or results and discussion section. If possible, a broad description of the diagnoses of patients seen in the 12 month period at the heme onc floor could be included to reflect the study population. Although it would be a correlative measure, this information could be useful to future research in considering tailored interventions.

Minor comment: Please add quotes around the names of the class descriptors when referring to them in the text of the manuscript ("Meal fortification" as an example).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
