Reviewer's report

Title: Awareness and factors associated with reported intake of folic acid-fortified flour among women of reproductive age in Ifakara, Morogoro region, Tanzania: A cross-sectional study

Version: 1 Date: 28 Feb 2019

Reviewer: Josiane Stelutí

Reviewer's report:

The authors improved the manuscript considering the comments. However, I still recommend the authors review the tables.

In the first version, the header of table (the description of the variables) was confused and I could not understand the analysis conducted (Two by two table or other analysis?). In the reviewed version, the authors elucidated it was two by two table. So, I suggest to delete the 95% CI (Table 1 and 2) and add the p-value. Furthermore, identify as foodnote which one was Pearson's Chi-square test or Fisher exact test.

The table 3 is excellent now.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
