Reviewer’s report

Title: Infant and young child nutritional status and their caregivers' feeding knowledge and hygiene practices in internally displaced person camps, Somalia

Version: 0 Date: 01 Jul 2019

Reviewer: Antonis Zampelas

Reviewer's report:

The aim of the present study was to investigate the nutritional situation of all children aged 6-59 months enrolled in a nutrition program provided by Save the Children in 2017 in internally displaced people's camps in Somalia and to identify gaps in the caregivers' hygiene and feeding practices in the planning phase of education targeting the caregivers. I found the paper very interesting and very easy to follow. I think it gives valuable information for future programs in a very troubled and suffering area.

Some minor comments

1. In the method section it would be nice to have one section on questionnaires and another for anthropometrics

2. A detailed section on statistical analysis is needed

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
