Although the authors have not performed the novel assays that I required, they have responded to my queries and have changed some parts of the discussion to avoid some speculations that were not based on their findings. Therefore, the paper is now acceptable for publication. My only suggestion is to remove the term Rattus norvegicus form the title, as it is not necessary.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
