Reviewer’s report

Title: Epicardial delivery of autologous atrial appendage micrografts during coronary artery bypass surgery - safety and feasibility study

Version: 0 Date: 21 Nov 2016

Reviewer: David Hildick-Smith

Reviewer’s report:

This pilot and feasibility study appears eminently reasonable.

Right atrial appendage tissue can be harvested without harm to the patient at the time of CABG.

The methods are clearly described and the pilot study is not of any ethical concern
