Reviewer's report

Title: A heel-strike real-time auditory feedback device to promote motor learning in children who have cerebral palsy: a pilot study to test device accuracy and feasibility to use a music and dance based learning paradigm

Version: 0 Date: 29 Jun 2017

Reviewer: Gita Pendharkar

Reviewer's report:

It is a good study in an area of demand. However, my only concern is in using the sensing device on barefoot.

1. Battery power required for the device is not discussed.

2. Any other safety issues are also not discussed.

3. The device should be tested on more number of CP children.
