Reviewer’s report

Title: Evaluating the Feasibility of a Pharmacist-Guided Patient-Driven Intervention to Improve Blood Pressure Control in Patients with CKD

Version: 0 Date: 17 Nov 2018

Reviewer: Alison Thomas

Reviewer's report:

This is an innovative project that has potential for refinement for use in other multidisciplinary CKD clinics. The project was well-constructed. The manuscript nicely outlines the challenges met in implementation of the project, and the PDSA cycles that (while not spelled out in that format) were carried out as the project evolved (e.g. change to screening methods, change to support for patients in using the EMR patient portal). It is relevant and timely, and well-written.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field
