Reviewer’s report

Title: Development of an internet-delivered educational video for acute whiplash injuries

Version: 0 Date: 06 Mar 2019

Reviewer: Tobias Bremer

Reviewer's report:

This is a well written, clear and accessible piece of research.

I was surprised to see that you did not include the 'patient voice' at the inception of the video as part of the multidisciplinary team but I can see that you consulted members of the public at a later stage and amended the video accordingly.

This is a well written piece of research, addressing an obvious need of an early education intervention, following road traffic accidents which is of importance for practicing clinicians and members of the public alike.
