Reviewer’s report

Title: The efficacy of foot orthoses in individuals with patellofemoral osteoarthritis: a randomised feasibility trial

Version: 0 Date: 30 Jan 2019

Reviewer: Matthias Perleth

Reviewer's report:

This is a well written manuscript of a carefully designed trial.

I only have some minor remarks:

p. 5, line 97: provide reason for the retrospective registration

p. 6, line 114: unclear what the authors mean that the NICE guidance obviates the need for imaging, explain more explicitly

p. 21, line 457: why is the study protocol not available?

p. 10, line 215: how did the authors decide whether the trial was feasible?

Table 3: use generic drug names instead of brand names; what is the compound of "Difflam"?
