Reviewer’s report

Title: Patient-reported outcome measurement in community-acquired pneumonia: Feasibility of routine application in an elderly hospitalized population

Version: 0 Date: 15 Jun 2019

Reviewer: Lata Jayaram

Reviewer’s report:

This paper examines the clinical utility of measuring patient related outcome measures (PROMS) in patients admitted to hospital acutely with community acquired pneumonia. While the sample size is small, the novelty of this paper lies in its generalisability with respect to the disease and age group. Further work needs to be undertaken in examining the clinical utility of PROMS in culturally and language diverse populations.
