Title: Pilot Test of an Educational Intervention to Improve Self-management of Diabetes in Persons Living with HIV

Version: 2 Date: 21 Aug 2019

Reviewer: Jean Craig

Reviewer's report:

Thank you for sending the edited draft.

Just two minor comments:

- Page 7, lines 7-11. I don't understand the justification for the sample size. Given the stated primary outcomes for the study (to adapt and test the feasibility of delivering the intervention), it is not appropriate to base the sample size on a treatment effect. It's not apparent what outcome the treatment effect pertains to. If sample size was a pragmatic decision based on information needs balanced with resources, then you could add an explanation along those lines.

- Page 16 line 13. In my view the word 'significantly' could be deleted, or the sentence could be slightly amended to show that you are referring to clinical not statistical significance.
