Title: Parent Empowerment and Coaching in Early Intervention: Study Protocol for a Feasibility Study

Version: 0 Date: 25 Oct 2019

Reviewer's report:

This is a well-written manuscript. I have only minor comments.

1. At the end of Phase 1, the authors wrote "Point-by-point inter-observer agreement data will be calculated as percent agreement by dividing the number of agreements between observers by the sum of both agreements and disagreements, and then multiplying by 100 to yield a percentage." I wonder why the author don't use Cohen's Kappa statistics to assess the agreement? Cohen's Kappa also takes care of chance agreement and hence will represent true agreement.

2. This is a Feasibility study, however I did not see a clear definition of "feasible", especially for Phase 4.
