Reviewer's report

**Title:** Patients', clinicians' and the research communities' priorities for treatment research: there is an important mismatch.

**Version:** 2  **Date:** 12 April 2015

**Reviewer:** Jim Elliott

**Reviewer's report:**

I have no further comments on the paper following the revisions the authors have made in response to the first round of comments I and the other reviewer made. I am pleased that the comments were taken as constructively as they were intended and think that the paper is much stronger as a result. I am content to accept the rejection of one of the comments for the reasons given by the authors.

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I know several of the authors but can declare that other than that I have no competing interests.
