Reviewer's report

Title: The impact of involvement on researchers: a learning experience.

Version: 0 Date: 20 May 2017

Reviewer: Adewale Adebajo

Reviewer's report:

This is an important, well conducted and well written piece of research. The findings from the study have important implications for the measurement of the impact of public involvement in research.

I would like the authors to consider addressing the following minor discretionary points:

Were there any differences noted between the insights obtained from carers as distinct to those from patients.

Do the authors think that the findings of their study, have any specific implications for coproduction or for joint researcher and patient/carer joint learning.
