Reviewer’s report

Title: Development of a Risk Score to Identify Patients with Type 2 Diabetes Mellitus and Multivessel Coronary Artery Disease Who Can Defer Bypass Surgery

Version: 1 Date: 05 Dec 2018

Reviewer: Orestis Efthimiou

Reviewer's report:

The authors adequately addressed most of my comments in their revision. One important issue that was not addressed is about reporting the model's calibration. In the methods section they mention that

"The calibration slope was determined to assess agreement.". But I could not find any mention of this in the results. I think that calibration needs to be reported.

Apart from that I do not have any other comments on the manuscript.
