Title: Individualised prediction of psychosis in individuals with at risk mental states (ARMS): protocol for a systematic review of clinical prediction models

Version: 1 Date: 03 Sep 2019

Reviewer: Anneke Damen

Reviewer's report:

I would like to thank the authors for addressing my comments. I have only one minor additional suggestion. Please remove the sentence "It also guides assessment of the risk of bias and the applicability of the reviewed prediction models." (page 8, line 31) as CHARMS is not meant for formal risk of bias and applicability assessment (PROBAST is designed for doing this).
