Reviewer’s report

Title: UMBRELLA PROTOCOL: Systematic reviews of multivariable biomarker prognostic models developed to predict clinical outcomes in patients with heart failure

Version: 1 Date: 15 Jun 2020

Reviewer: Hwanhee Hong

Reviewer's report:

Authors addressed comments from both reviewers thoughtfully in this revision. I especially like these edited sentences: "We will summarize data only from prognostic models that predict either single or composite outcomes made up from two or more of the HF clinical outcomes stated in Table 1. Following standard systematic review meta-analysis will be attempted only in subsets of models with similar PICOTS and analysis methods. If meta-analysis is not possible results will be presented as a narrative." I don't have additional comments.

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests

**Publons Reviewer Recognition.** Springer Nature can send verification of this review directly to Publons (a subsidiary of Clarivate Analytics). If you would like to take advantage of this service, please click on the “Yes” option below. Your name, email address, title of the reviewed manuscript, name of the journal, and date of your review submission (the “Review Data”) will then be transmitted to Publons upon publication of the manuscript. If you have already registered at Publons, they will notify you of the receipt of this review and update your profile as per your settings and their policy. If you are not registered with Publons, you will receive an email from them asking you to register in order for them to be able to recognize your review on your new profile page. Publons may use the Review Data to generate derivative metadata for the benefit of Publons and you as a reviewer, carefully considering the sensitivity of such information. For example, Publons may verify your record as a reviewer by updating your profile published on its webservice if you have registered for such service or help editors to identify candidate reviewers. Please find the details of processing in Publons’ privacy policy https://publons.com/about/terms
