Reviewer’s report

Title: Severe Skin Disease in Lupus associated with Hemophagocytic Lymphohistiocytosis: Case Reports and Review of the Literature

Version: 0 Date: 27 Oct 2018

Reviewer: Shereen Oon

Reviewer's report:

Worthwhile case descriptions and literature review highlighting a rare association of new onset severe cutaneous lupus with haemophagocytic lymphohistiocytosis.

Minor points

Define abbreviation HLH after first use in abstract.

Where is Table 1? (Line 151)

Might it be worth including a summary Table highlighting the manifestations and investigations that fit SLE vs HLH criteria, and treatment/outcome, of these two cases vs the other similar cases in the literature?

Should Line 190 read 'furthermore, HLH can present with skin manifestations but (in) the absence of antibodies can eliminate an associated autoimmune process’?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
