Reviewer's report

Title: Serious infections in patients with self-reported psoriatic arthritis from the Psoriasis Longitudinal Assessment and Registry (PSOLAR) treated with biologics

Version: 2 Date: 03 Sep 2019

Reviewer: Tin Lok Lai

Reviewer's report:

Thank you for your revisions. (1) As mentioned before - Since the pneumonia is found to be one of the most common infections in the outcome, the background history of pulmonary disease is crucial. Therefore the detailed history or definitions of pulmonary disease of the cohorts should be written. Sorry that I can't find the relevant information either in the article or in the table.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
