Reviewer's report

Title: Views of Primary Care Physicians and Rheumatologists Regarding Screening and Treatment of Hyperlipidemia among Patients with Rheumatoid Arthritis

Version: 0 Date: 05 Sep 2019

Reviewer: Chang Hee Suh

Reviewer's report:

The manuscript describe the qualitative study about the response of primary care physician and rheumatologist about the screening and treatment of hyperlipidemia in patients with rheumatoid arthritis.

It is interesting that the rheumatologists expressed the assessment and management of CVD in patients with RA is fall within their role. However this study was done in the USA, so it is not generalized to other countries. I think there is a need of commenting these.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
